Tropical Science

AN INTERNATIONAL JOURNAL OF SCIENCE, TECHNOLOGY AND ECONOMICS APPLIED TO RENEWABLE NATURAL RESOURCES DEVELOPMENT

VOLUME 34 1994 ISSN 0041–3291

PUBLISHED BY WHURR PUBLISHERS LTD.

Tropical Science

Incorporating *Tropical Stored Products Information*

EDITOR

Dr G. Ames *26 Hurstleigh Drive, Redhill, Surrey RH1 2AA, UK*

INTERNATIONAL EDITORIAL BOARD

Dr B. L. Amla *Director, Central Food Technological Research Institute, Mysore, India*

Dr R. O. Arunga *Director, Kenya Industrial Research and Development Institute, Nairobi, Kenya*

Dr R. H. Booth *Assistant Director General (International Cooperation), International Center for Agricultural Research in Dry Areas (ICARDA), Aleppo, Syria*

Dr Mary E. Carter *Associate Administrator, Agricultural Research Service, USDA, Washington DC, USA*

Dr E. Chalutz *Head, Institute for Technology and Storage of Agricultural Products, Agricultural Research Organization, Israel*

Dr R. D. Cooke, *Deputy Director, Natural Resources Institute, Chatham Maritime, Kent, UK*

Dr A. Huijsman *Coordinator, Royal Tropical Institute, Amsterdam, The Netherlands*

Prof. Adel A. Kader *Professor of Postharvest Physiology, Dept of Pomology, University of California, Davis, CA, USA*

Mr Rüdiger Kaske, *formerly Senior Planning Officer, International Agricultural Research Division, GTZ, Eschborn, Germany*

Prof. R. A. Lawrie *formerly Professor of Food Science, University of Nottingham, Sutton Bonington, Leics, UK*

Mr J. A. McFarlane *Grain Technology Dept, Natural Resources Institute, Chatham Maritime, Kent, UK*

Prof. J. R. McWilliam *Director, Australian Centre for International Agricultural Research, Canberra, Australia*

Dr J. Nabney *Deputy Director, Natural Resources Institute, Chatham Maritime, Kent, UK*

Professor P. O. Ngoddy *Professor of Food Engineering and Processing, University of Nigeria, Nsukka, Nigeria*

Dr Mohamed A. Nour *Regional Director, UN Development Programme, New York, USA*

Mr T. J. Perfect *Deputy Director, Natural Resources Institute, Chatham Maritime, Kent, UK*

Dr R. O. Teixeria Neto *Director, Engineering and Planning Division, Instituto de Tecnologia de Alimentos, Campinas, São Paulo, Brazil*

Prof. A. K. Thompson *Professor of Post-Harvest Technology, Silsoe College, Cranfield, UK*

Prof. L. A. Wilson *Professor of Crop Science, University of the West Indies, St Augustine, Trinidad*

Tropical Science publishes information about advances in science and technology and their application in making better use of the tropical environment and its products. *Tropical Science* is international both in its sources of articles and its readership. *Tropical Science* now incorporates *Tropical Stored Products Information.*

GENERAL INFORMATION

Publication data: *Tropical Science* is published four times a year by Whurr Publishers Ltd., 19b Compton Terrace, London N1 2UN (071-359 5979) under an agreement with the Natural Resources Institute (NRI), Chatham Maritime, Kent, UK. Volume 34 appears in 1994. Views expressed in Tropical Science are not necessarily those held by the NRI.

Subscription rates: subscriptions run for a full calendar year. Prices given are per volume (4 issues), including accelerated surface postage. For 1994, they are: £79.00 (UK); $145.00 (US). Airmail postage £15 per volume extra.

Subscription orders: orders can be placed with agencies, bookshops or direct with Whurr Publishers, Distribution Centre, Blackhorse Road, Letchworth, Herts, SG6 1HN, UK (0462 672555); or Whurr Publishers Ltd, PO Box 1897, Lawrence, KS 66044–8897, USA.

Microfilm/Microfiche: Microform copies are available from UMI, 300 North Zeeb Road, Ann Arbor, MI 48106–1346, USA.

Change of address: both old and new addresses should be sent to the subscription source.

Back issues: information on the prices and availability of back issues is available from Whurr Publishers Ltd.

Advertising: enquiries should be directed to Whurr Publishers Ltd.

Submission of papers: intending contributors are asked to consult the *Guide for Authors* on the inside back cover of each issue.

Copyright: © 1994 NRI, Overseas Development Administration. All rights reserved. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the prior permission of the copyright owner.

Multiple copying of the contents or parts thereof without permission is in breach of copyright. However, in the UK, multiple copying is permitted only in accordance with the terms of licences issued by the Copyright Licensing Agency or with permission in writing from the publisher.

In the USA, authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by Whurr Publishers Ltd on behalf of the NRI for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $3.50 per item copied is paid directly to CCC, 27 Congress Street, Salem, MA 01970.
In all other countries, single or multiple copying of the contents or parts thereof is permitted only in accordance with legislation currently in force.

Guide for authors

Tropical Science aims to disseminate scientific, technological and economic information of practical value to those concerned with the development of renewable natural resources in the Tropics and Sub-Tropics (and particularly in developing countries). Formerly, its scope was restricted to the post-harvest sector of plant and animal production. Now it extends into the pre-harvest and planning aspects of agriculture, animal husbandry, forestry and fisheries so that, renewable natural resources development activities can be reported as a whole or be examined from particular angles e.g. integrated operations, socio-economic effects, environmental impact, etc.

The Editor will consider articles within the above scope in the following categories:

Research Papers covering original work which has good potential for practical application.
Reviews on specific topics of practical importance, not available elsewhere in up-to-date form. As well as covering recent literature, these should reach conclusions about gaps in knowledge and the need for further research and development. Space limitations dictate conciseness.
Development Reports describing the application of science, technology and economics in real life situations, particularly in developing countries, where there has been some novelty of approach and the findings may be of wider interest and benefit. *Accounts of multi-disciplinary development projects in the field are especially sought.*
Short Communications in which advances in knowledge or experience of practical significance are briefly announced.

Two copies of the material for publication should be sent to the Editor, *Tropical Science*, 26 Hurstleigh Drive, Redhill, Surrey RH1 2AA, United Kingdom. *The author is advised to retain at least one copy, as the Editor cannot accept responsibility for damage or loss of manuscripts.* Submission of a paper will be taken to imply that it has not been submitted elsewhere for publication and that, if accepted, it will not be published elsewhere without the consent of the Editor and Publisher, as it is then the copyright of the Journal.

Papers, in English, with spelling conforming to the *Concise Oxford Dictionary of Current English*, should be typed, double-spaced and with a wide margin, on one side only of standard A4 paper (30 × 21 cm). *S.I.* (Systeme International) *units* (metric) should be used throughout. The *title page* should include the full title of the paper, with a running title, then the name(s) of the author(s), with the place of work and the address for correspondence. There should be an *abstract* of the paper (not exceeding 200 words in length and preferably shorter) stating the main findings as briefly as possible, so that, if reproduced in abstract journals, the author's contribution will be clear. For indexing, this should be followed by a small number of *key words*. The *text* should be on pages numbered consecutively, with tables, footnotes and figure legends on separate sheets at the end. All tables and figures should be referred to in the text and their approximate position for insertion should be noted in the margin. *Tables* and *figures* should be numbered consecutively and have clear, descriptive captions. Nil results should be indicated and distinguished clearly from absence of data (ND). *Headings* should be clearly presented in a descending sequence from the first to third level. Encircled numbers 1–3 should be penciled in the margin against each heading to confirm the level. *References* within the text should be presented according to the Harvard sysem. All authors names and the year of publication should be given at the first mention, e.g. (Brown, Smith and Williams 1975), but subsequently abbreviated (Brown *et al.* 1975) unless there are more than two authors, when *et al.* should be used every time. The *reference list* should be at the end of the paper.

References should be arranged in alphabetical order according to the first author and all authors' surnames and initials should be included up to a max. of six authors. If there are more than six authors use the first author's details only plus *et al.* The year of publication should follow; then the title of the paper, report, book, conference etc. (as used in the original, with the English language translation if necessary); then the source of the publication. For papers, the journal title should be expressed *in full*, followed by the journal volume number and the issue number (*if* pagination starts afresh in each issue) and the first and last page numbers of the article concerned. For books, please provide the town of publication, then the publisher, the edition number (if not the first), and the total number of pages in the book.

Examples:
1. Chang Y. S. and Smith J. B. (1973) Characterization of peach pectin. *Journal of Food Science* **38,** 646–648.
2. Coursey D. G. (1967) *Yams*, pp. 172–178. London: Longman. 230 pp.
3. Adams J. M. and Schulten G. G. M. (1978) Losses caused by insects, mites and microorganisms. In: *Post-harvest Grain Loss Assessment Methods* pp. 83–93 (Harris K. L. and Lindblad C. J. eds). New York: American Association of Cereal Chemists. 150 pp.

Illustrations. Black and white line or halftone figures will normally be accepted. Please use only to the extent essential to clarify the text. (Under exceptional circumstances colour photographs *may* be allowed, but only on the understanding that the author will contribute to the cost of reproduction and extra printing costs.) *Photographs* – these should be glossy prints of good contrast, labelled on *the reverse side* using a chinagraph (a soft waxy pencil) pencil on *the top edge* giving the authors name and the figure number. **NB:** paper clips, folding, or writing (either on the front or reverse) are all liable to render the prints useless for reproduction purposes. *Line Drawings* – these are likely to include line graphs, block graphs, and schematic illustrations. All should be prepared with black Indian ink on good quality A4 (8.25 × 11.75 inch/210 × 197 mm) draughting film or white artboard (samples are available). Corrections should be made with process white paint. All figures should convey information simply with bold, clear traces. To avoid reproduction problems please follow this hierarchy of preferred symbols for graph traces (a) and block graphs (b):

Page proofs are sent to the author for final checking and should be returned immediately. Alterations in the text at this stage, other than essential corrections, may be charged to the author, if considered excessive.

Twenty-five *offprints* of each paper will be supplied, free of charge, to the senior author.

Tropical Science

Volume 34, 1994

CONTENTS

Number 1: Special issue on African Cassava Mosaic Germinivirus

1 Editor's note

3 African cassava mosaic virus disease: an under-estimated and unsolved problem
J. M. Thresh, L. D. C. Fishpool, G. W. Otim-Nape and D. Fargette

15 Properties, relationships and distribution of cassava mosaic geminiviruses
M. M. Swanson and B. D. Harrison

26 Effects of African cassava mosaic geminivirus on the yield of cassava
J. M. Thresh, D. Fargette and G. W. Otim-Nape

43 The effects of African cassava mosaic geminivirus on the growth and yield of cassava in Uganda
G. W. Otim-Nape, M. Shaw and J. M. Thresh

55 *Bemisia tabaci:* the whitefly vector of African cassava mosaic geminivirus
L. D. C. Fishpool and C. Burban

73 Genetic polymorphism amongst Ugandan populations of *Bemisia tabaci* (Gennadius) (Homoptera: Aleyrodidae), vector of African cassava mosaic geminivirus
J. P. Legg, R. W. Gibson and G. W. Otim-Nape

82 Transmission of African cassava mosaic geminivirus by the whitefly (*Bemisia tabaci*)
J. Dubern

92 The spread of African cassava mosaic geminivirus in coastal and western Kenya
K. R. Bock

102 Control of African cassava mosaic geminivirus by using virus-free planting material
K. R. Bock

110 Breeding for resistance to African cassava mosaic geminivirus in East Africa
D. L. Jennings

123 The epidemiology of African cassava mosaic geminivirus: reversion and the concept of equilibrium
D. Fargette, J. M. Thresh and G. W. Otim-Nape

134 Studies on cassava brown streak virus disease in Kenya
K. R. Bock

146 Sanitation techniques for cassava
E. A. Frison

154 Long-term absence of symptoms in heat-treated African cassava mosaic geminivirus-infected resistant cassava plants
R. W. Gibson

Number 2

159 NRI's second century

161 Changes in quality of fresh cassava tubers during storage
Joseph B. George and Cecilia B. Browne

166 Purification and characterization of glucose 6-phosphate dehydrogenase from the liver of pearl spot (*Etroplus suratensis*)
P. T. Mathew and K. Gopakumar
182 Effects of slice thickness on the acceptability of fish crackers ('keropok')
S. Y. Yu
185 Improvement of onion storage in the Sudan
S. K. Musa, Y. M. Abdalla, E. Haimoura and Y. Sulieman
191 Social issues in trypanosomiasis control
J. Salmon and J. C. Barrett
203 Production of fermented cassava starch (polvilho azedo) in Brazil
A. Westby and M. P. Cereda
211 Influence of site and fruit position on the pulp colour and texture of bananas
P. A. Hughes and H. Wainwright
216 Quantitative methods for assessing the severity of anthracnose on yam (*Dioscorea alata*)
S. A. Simons and K. R. Green
225 Clonal variations in the response of black tea quality parameters to time of the year in western Kenya highlands
P. Okinda Owuor
231 Behaviour of malate, isocitrate and glucose 6-phosphate dehydrogenases in germinating rice in relation to salt tolerance
Sadhana Katiyar and R. S. Dubey
241 RAFS Bookshelf
245 Pest Management Bookshelf

Number 3

249 Obituary: Philip Spensley
251 A multidisciplinary approach to needs assessment in agricultural extension: the Caribbean experience
Joseph Seepersad
259 Effects of boiling on the texture of cassava clones: a comparison of comparative strength, intercellular adhesion and physicochemical composition of the tuberous roots
G. Eggleston and R. Asiedu
274 Effect of home food processing methods on the nutritional value of plantains in Côte D'Ivoire
Aboua Firmin
282 Soil characteristics and their relation to fusarium wilt of chickpea (*Cicer arietinum* L.)
S. K. Sugha, S. K. Kapoor and B. M. Singh
289 Experimental studies on storage of paddy in different traditional structures
B. K. Bala, M. A. Zaman, B. K. Biswas and A. R. Khondokar

297 Modelling water absorption characteristics of some Nigerian varieties of cowpea during soaking
P. A. Sopade, E. S. Ajisegiri and G. N. Okonmah
306 Trap cropping and its effect on yield and *Orobanche crenata* Forsk. infestation on following pea (*Pisum sativum* L.) crops
H. Schnell, K.-H. Linke and J. Sauerborn
315 Susceptibility of *Rhyzopertha dominica* (F.) (coleoptera: bostrichidae) and *Tribolium castaneum* (Herbst) (coleoptera: tenebrionidae) to cyanogens in dried cassava products
P. Rajamma, J. A. McFarlane and N. H. Poulter

DEVELOPMENT REPORT
321 The performance of a timber drying kiln fuelled by sawdust and a solar kiln
R. C. Marder, A. P. Robinson and H. C. Coote

REVIEW
335 Physiological deterioration in cassava: possibilities for control
J. R. Beeching, A. D. Dodge, K. G. Moore, H. M. Phillips and J. E. Wenham

Number 4

345 Effects of pasteurization and packaging on properties of wine from over-ripe mango (*Mangifera indica*) and banana (*Musa acuminata*) juices
J. O. Akingbala, G. B. Oguntimein, B. A. Olunlade and J. O. Aina
353 Mycoflora of developing sorghum grains with special reference to *Aspergillus flavus*
C. M. Usha, K. L. Patkar, H. S. Shetty, R. Kennedy and J. Lacey
361 Stability for grain yield of soybean varieties in the predominant soybean belt of India
P. S. Bhatnagar, S. P. Tiwari and S. K. Kamra
364 Effect of postharvest treatments on the storage life of avocado pear (*Persea americana*, Mill.)
M. I. Nwufo, M. I. Okonkwo and J. C. Obiefuna
371 The physicochemical properties of starch of some accessions of *Amorphophallus paeoniifolius*
S. N. Moorthy, M. Unnikrishnan and K. R. Lakshmi
377 Chemical evaluation of the effects of cooking on the nutritive value of conophor seed (*Tetracarpidium conophorum*)
D. O. Edem, E. S. Ekwere and O. U. Eka
381 Enzymic hydrolysis of proteins from *Aristichthys nobilis* by protease P 'Amano' 3
S. Y. Yu and S Fazidah
387 Utilization of cow dung in processing Nile perch in Eastern Lake Victoria
B. S. Msuku and J. F. Rodgers

391 Effect of temperature regime on the toxicity of endosulfan and deltamethrin to tsetse flies, *Glossinia morsitans morsitans*
Sandra C. Smith, Edward G. Harris and Kate Wilson
401 The use of plant materials to control insect infestation of cured fish
A. R. Ward and P. Golob
409 Amino acid and sugar profiles of insect infested and uninfested plain-dried versus parboiled cassava chips
G. Padmaja, T. Premkumar, Vanessa Plumb, Zoe Bainbridge and J. F. Wood
426 Volatiles as indicators of fungal growth on cereal grains
D. R. Twiddy

REVIEW
429 Genetic and varietal improvement in the technological qualities of rice
T. Srinivas and M. K. Bhashyam
441 AUTHOR INDEX
443 SUBJECT INDEX
